REDFERN'S AND WARNER'S

Our New Fall Stock of Corsets is Coming in Fast. We Can Now Fit Every Customer With the Newest Style Corset

CORRECT corseting proves a revelation to all types of forms. It not only remedies defects by giving lines of grace, but adds a buoyant, elastic step.

Our styles for 1908 are selected from the very best makes we know, and you will find that the model our saleswomen select for you will be correct in every detail. We pin our faith to Warner's Rust-Proof Corsets. We have a sufficient variety to fit you perfectly.

The maker's guarantee which we extend to you covers the rusting, breaking or punching through of the boning, clasps, back-bone or sidesteels; the rusting of eyelets or metal parts of hose supporters; the pulling through of eyelets.

The Hose Supporters are the famous Security make. Prices range from \$1.00 to \$3.50 per pair. Every pair guaranteed.

WARNER'S RUST-PROOF—Style 189 is novel inasmuch as it is high above the waist, with a comparatively short hip that slopes up sharply towards the back. The long, straight front line gives a chic air to the form corseted in this model that is decidedly French. A point to call your attention to in Warner's Rust-Proof Corsets of moderately high and ultra high bust is that the line where the corset terminates around the top is not discernible through the dress.

Security Rubber Button Hose Supporters.

Style 189, Coutille, \$2.00; style 289, Batiste, \$2.00.

WARNER'S RUST-PROOF—Style 281—for Well-Developed Forms. A beautiful model that gives the figure contour classified as "stunning," well-proportioned with long waist.

Attached are the Security Rubber Button Hose Supporters, that assist in holding the corset snugly:

181, Coutille, Price, \$1.75 per Pair; 281, Batiste, Price, \$1.75.

REDFERN WHALEBONE CORSETS—A beautiful model made of novelty cloth, satin broche, trimmed with wide embroidered insertion, edged with Val-lace and woven with satin ribbon.

High bust, with an extremely long skirt—the back fully 3½ inches longer than the front and cut square to entirely enclose the figure.

Boned with the purest Arctic Whalebone, which molds into the form without losing its power to shape. All metal parts of the supporters, clasps and eyelets of corset are guaranteed rust-proof. The whalebone is rounded and celluloid tipped to prevent its punching through the fabric.

The Hose Supporters are the famous Security Rubber Button make, of wide silk elastic.

Model 3636, Price, \$12.00.

REDFERN WHALEBONE CORSETS—Model 4343. Model of white novelty cloth, a silk and cotton mixture, the silk forming the floral pattern. A beautiful model in wear. It is designed for the tall, well-proportioned form, has a high bust and deep hip. Its special feature is a hip-gore, giving room for figures with a sharp high curve at the back, below the waist. Model 4343, Price, \$6.00.

REDFERN WHALEBONE CORSETS—A highly approved new model of the long back and high bust design, giving to a medium figure the curves and length between bust and waist now considered correct form. As much attention is given to shape below the waist at the back as is given above and to the waistline and flat effect. The materials are as beautiful in their way as is the shape, and the trimmings are exquisite.

Security Rubber Button Hose Supporters. Model 41, Coutille, \$6.50; model 39, Batiste, \$5.00 per Pair.

REDFERN WHALEBONE CORSETS—Model "27"—We verily believe the most beautiful corset we know.

Not only is it fair to look at, but a joy to wear.

Cut high and quite straight across the top, with the new long back. The skirt is cut to fully enclose the hips.

Attached are the Security Rubber Button Hose Supporters—the proper hose supporter for so excellent a corset.

Well sustained with the best Arctic whalebone. Model "27," Coutille, Price, \$10.00; model, "1818," Batiste, Price, \$8.00.
